Professional Profile

Full Stack Junior Developer with proven experience delivering real and scalable web solutions for clients as a freelancer. Specialized in Python, Reflex, JavaScript, FastAPI, and React. Results-oriented, adherent to best practices and responsive web development. Highly adaptable to different technologies and agile methodologies.

Professional Experience

Full Stack Developer – Freelancer

August 2023 – Present

Main achievements and projects:

• **Personal Task Manager (To-Do List):** Development of a modern and secure web application for personal task management. Features user registration with email confirmation, secure authentication (JWT), password recovery, and full task CRUD—all in a private environment for each user. Advanced features: account deletion and recovery, automatic cleanup of inactive users, feedback messages, and fully responsive neuromorphic design. **Stack:** React (Vite), classic CSS (neuromorphic design), FastAPI, SQLAlchemy, Alembic, PostgreSQL (Render), SMTP, JWT, Vercel (frontend), Git/GitHub.

• **Personal Links Page (my-links-page):** Developed a web application to centralize and manage users' important links. Implemented full CRUD, visual customization, and adaptable structure using Reflex (Python).

• **Professional Portfolio Website (portafolio):** Responsive web platform to showcase personal information, projects, and technology stack in a professional way. Easy editing, intuitive navigation, and fast deployment using Reflex.

• **Responsibilities:** Requirements analysis, end-to-end web application design and development, frontend/backend integration, client communication, and delivery of turnkey projects.

Store Manager – DIA Argentina

May 2021 – July 2023

• Led teams and managed daily operations, solving real-time issues and optimizing processes through digital tools and data analysis.
• Core skills: leadership, organization, effective communication, decision making, performance under pressure, and adaptability.

Technical Skills
